About Northside ISD

Transform the Learning Experience for Students

Established in 1949 by the consolidation of 12 rural school districts, Northside ISD today is 355 square miles of urban landscape, suburban communities, and rural Texas hill country. As South Texas' largest school system, Northside ISD is the "Destination District" for thousands of families wanting a high quality school system.

Challenge

Before Foundation 99, Northside ISD had no additional resources they could give their employees on financial wellness. With over 7,000 teachers in their district, it was difficult for Northside ISD to account for their employees' financial wellness alone. It was easy for an employee struggling with their finances to get lost in the masses.

Outcomes

It wasn't until Northside ISD and Foundation 99 came together on February 17, 2022 that employees could have access to financial wellness. Since implementation, Northside ISD was able to provide their employees not only with online financial health tools and resources, but in-person financial guidance meetings and events hosted by Financial Coaches - cultivating a holistic financial wellness approach.

Impact

In just 8 short months, the impact Foundation 99 has had on the employees has been exponential. Roughly 8% of the district sought continuous help, and of these 600+ registrants, almost 200 people sought online help with financial health tools. Additionally, Northside ISD scheduled 10 events throughout the calendar year, giving on-site help to those who aren't online.
